The organizers are also planning to hold an exhibition of ophthalmic equipment.

Articles and abstracts should be prepared in the traditional style, from 2 to 5 pages of A4 format in printed form (Times New Roman font, margins 2 cm, size 14, spacing 1.5) in Microsoft Word format with *.doc or *.rtf extension, and sent to the following e-mail addresses:

- Prof., Rakhman Mukhamadiev at rakhman.mukhamadiev@mail.ru and rakhman.mukhamadiev1948@gmail.com, as well as copies to Fakhridin Umarov: ufa090@inbox.ru

Form of participation:

Speaker, Listener, Article publication, Multimedia (video presentation, video film), Poster presentation

Outline of the paper:

1. Title of the paper
2. Names of the author(s)
3. Affiliation, address
4. Abstract, keywords
5. The volume of the abstract text is no more than 5 pages
6. References

Application for participation in the conference:

Name	
Form of participation (presenter, poster presentation)	
Title of the presentation or poster presentation	
Affiliation	
Academic/scientific degree, if applicable	
Phone	
E-mail	

Dear guests and participants of our conference, against the backdrop of Samarkand, Bukhara and Khiva, the ancient Termez with a 2700-year history has remained in the shadows until recently. This is partly due to the fact that Termez was a border city and in Soviet times the city was closed to foreign visitors due to its proximity to Afghanistan.

Since Uzbekistan became independent country in 1991, Termez has opened up to the world. Termez has rich historical heritage of Central Asian cultures. Archaeological findings indicate that our cultural and historical heritage is in no way inferior to ancient Greek or ancient Egyptian museum values.

The Archaeological Museum in Termez is the only one in the Central Asian region. There are more than 600 archaeological excavations from around Termez. The historical records provide that the city was established by Alexander the Great in the 2nd century BC, and was originally called Oxus of Alexandria. The ancient monuments that are still remaining include the Macedonian Bridge. The village in which it is located is called “Makedon”.

Termez was part of the great state of Bactria and the Kushan Empire that flourished in the 5th and 7th centuries AD. These empires ruled significant parts of Asia, Middle East and India. Termez was also one of the central places of the Buddhist religion. The famous Japanese archaeologist Kyuzo Kato spent all his adult life in Uzbekistan and claimed that the center of the Buddhist religion was in Dalvarzintepe, near Termez. And here he had ended his earthly life. For his work, Kato was awarded the highest award of our state, the Order of Friendship of Peoples. Georgian archaeologist Edward Rtveladze also spent his whole life in our region. He was awarded the title of Hero of Uzbekistan and was elected as a senator in the Supreme Legislative Chamber of the

Republic of Uzbekistan.

Islamic civilization flourished on our territory. The great scientist Al Khakim At Termiziy invented 12 cycles of annual calculations a thousand years ago, which are still used in our times. Another Islamic scholar, Iso At-Termeziy created and collected Islamic commandments.

Here is the only Women's Islamic Academy "Kirk-Kiz", created 1000 years ago by the descendants of our prophet Muhammad, as well as the tomb of the descendant of our prophet Muhammad Saidi.

And today Termez is called the pearl of the south of Uzbekistan. With a population of more than 200,000 people, it is rapidly developing and has 6 higher educational institutions.

Babatag is the grandfather of all the mountains of the world. They are unique in their natural beauty.

Our land is very rich in natural beauty. The **Sangardak** waterfall attracts tourists in the Hissar mountains.

Guests and delegates of the conference will visit a historic bridge, **Friendship Bridge over the Amu Darya River between Uzbekistan and Afghanistan**. In February 1989, the Russian General Gromov withdrew Soviet troops from Afghanistan through this bridge.

Surkhandarya region is unique in that it is supplied by 4 mountain rivers: these are the Tupalang and Karatag rivers, that merge to form the Surkhan River (the name of the region comes from), as well as the fastest flowing river – the Amu Darya. During the time of Alexander the Great, the Amu Darya was called Oxus, during the Persian rule – Jaykhun, and since the time of the Mongol invasion - the Amu Darya). This mighty river is 2800 kilometers long, originates in the Hindikush mountains and makes a border with our southern neighbor, Afghanistan.

The uniqueness of the nature of our region is enriched by three reservoirs that include many recreation areas.

Kumkurgan Reservoir

Tupalang Reservoir in the Hissar Mountains

Uchkizil Reservoir, near Termez

Dear guests and participants of the conference, welcome to our ancient city of Termez!

For foreign delegates, the conference organizers will cover the costs associated with the conference, accommodation and local excursions.

General Chairman of the Organizing Committee:

- **Azamat Yusupov**, Doctor of Medical Sciences, Chief Ophthalmologist of the Republic of Uzbekistan, Director of the Republican Specialized Center for Eye Microsurgery,

Organizing committee co-chair:

- **Kamil Abdivakhidov**, Head of the Surkhandarya Regional Health Department
- **Furkat Otamuradov**, Director of the Termez branch of the Tashkent Medical Academy

Contact Person: **Rakhman Mukhamadiev** (Tel. +998-93-796-66-08)
