The Summer School will occur from May 27th to May 31st, 2024 in Prishtina, Kosovo.

## Overview of SS24

In today's rapidly evolving world, digitalization is revolutionizing the landscape of healthcare and social services. Our summer school aims to explore the profound implications of digital innovations on health and social impact.

Through a series of engaging lectures, interactive workshops, and inspiring talks, participants will delve into the transformative power of digitalization and innovation in addressing contemporary challenges in healthcare delivery and social services.

We hope to inspire students to think creatively and critically about the potential advantages and downsides of digitalization and innovation and its social impact as well as to cultivate a community of students interested in exploring the potential and the benefits of implementing digitalization and innovation as a concept.

The use of assistive technologies, such as robotics, virtual and augmented reality, e-health, tele-health, and remote services, is becoming increasingly important in healthcare, and students who participate in this summer school will be at the forefront of this innovative field. They will gain practical experience and knowledge that will be highly valuable in their future careers as healthcare professionals, researchers, or entrepreneurs.

This summer school is offering a unique and valuable learning experience that can prepare students for the future of healthcare and wellbeing, and equip them with the skills and knowledge needed to make a positive impact on patients, healthcare systems, and society as a whole.

Moreover, our program goes beyond academic discourse to include enriching social and cultural activities, fostering a vibrant community of learners and innovators. Participants will have the opportunity to network with experts, exchange ideas, and collaborate on innovative projects aimed at driving positive change in health and social domains.

Join us on this futuristic journey!
