

15th to 18th August 2022 online and 23rd August to 1st September 2022 in Germany

We proudly present to you this year's **SustainMV** hybrid summer school.

This summer school project has only started last year online and is jointly hosted by all universities in Mecklenburg-Vorpommern (MV), North-East Germany. It is open to international Bachelor, Master and PhD students; postdoctoral researchers and academics also welcome. The overarching theme for this unique event is **Sustainability** in the fields of **Tourism, Renewable Energies, Digital & Technological Innovations, Recycling & Waste Management and Ecosystems**, showcasing opportunities for transformation through science and education for a sustainable future. It is funded by the Mecklenburg-Vorpommern Ministry of Education, Science and Culture.

This year's hybrid version will consist of two parts: an online part from 15th to 18th August 2022 and an in person part from 23rd August to 1st September 2022 in Stralsund & Greifswald, Germany. The online part will give a thorough introduction to what sustainability research & education in MV looks like. The registration for the online event will be open in June.

Please find more information on the program and last year's summer school on our website sustainmv.de.

We look forward to welcoming students from your universities all over the world.

Best wishes from Greifswald,

Nadine Voigt
