TIP FAKÜLTESİ

Education is carried out as integrated modular blocks and the language of instruction is Turkish. The education of students who come with international exchange programs such as the Erasmus + Program is generally carried out in the clinical internship period in the departments clinics/polyclinic as chairside practical applications and under the supervision of an academic staff who can speak English. Within this scope, in the 2020-2021 academic year, it has been found appropriate that the students who come to our country within the Erasmus Program being accepted for practical implication at the 6th grade when face-to-face education is started, and the students who can follow Turkish lessons at the 4th and 5th grades benefiting from the blended (online + face to face) education. The faculty does not consider offering in English courses for Erasmus students besides.
